## Terms and Conditions

### Delivery

All machine deliveries will be carried out by a third-party logistics company specialising in large pallet deliveries.

Tracking and ETAs cannot be given in advance and all deliveries are detailed as being delivered between 8am & 5.30pm, occasionally we can offer a two hour delivery window, but only on the day of delivery, unfortunately these cannot be guaranteed and should be used as guidance only.

Pallet deliveries are what is described as 'kerb-side', therefore the driver is only instructed to offload and deliver to the nearest access point outside of building, they are not authorised to enter the building, therefore cannot be liable for any damage caused should they do so.

The customer is responsible for informing us prior to dispatch of any restrictions, such as one way street, red zones, or low bridges, should delivery be aborted for any such reason, there will be additional charges.

### Returns

Should the goods no longer be required for example, ordered in error, we will accept returns if unwrapped in original packaging and we are informed within 7 days of original delivery.

Return charges (5%) and minimum (£60+vat) re-stocking fee will apply.

### Installation

- Installation and commissioning of machines offered provided that electrical and water supplies are within 1 metre of machine location (within the same room) and any counter holes are already drilled.
- A surcharge may be levied if services are further away or holes need to be cut. We can supply an installation checklist to be adhered to if necessary.
- Please note that if holes need to be drilled, we can only do this with prior notice and if the material that needs drilling does not require specialist tools (stainless steel, granite, marble etc)
- All utilities must be ready to connect; our technicians and service partners may not be able to carry out plumbing or electrical work onsite.
- Installation and set-up/ calibration of grinder. Please supply company standards to ensure we use correct dose (dry and wet) & desired extraction times. Technicians can only follow guidelines; we recommend that roaster is onsite to fine tune set up.
- Install water filter – water will be tested for PH, TDS and Carbonate Hardness
- Set up machine program and basic staff training.
- Single machine installations should be completed within 2 hrs, surcharges (charged at £35.00 per half hour) may apply if engineers are delayed for reasons out of their control.
- Boilers and Batch brew machines will only be installed at our discretion alongside an espresso machine.
- Where possible, installations are to be completed as the 1st Job (8-9am) to assure punctuality, failing that, we can adhere to am/ pm requests.

If dedicated times slots must be adhered to a surcharge may apply.

- Installations can be completed outside of 'usual hours' (see below) with exceptional notice – P.O.A
- Technicians will not be accompanied unless requested (extra charge), therefore help MUST be available onsite to lift equipment.

### Parts Warranty

All new Conti Espresso machines come supplied with a 24-month parts only warranty, effective from the day of delivery, but provisions can be made if installation is delayed providing full details are emailed to [service@ozespresso.co.uk](mailto:service@ozespresso.co.uk).

These provisions will be on a case by case and shouldn't be assumed unless specific permission granted.

All machines are subject to a pre delivery inspection; therefore, machines are filled with water to test all features. We recommend that machines are not left unused for a period longer than two weeks after delivery.

All parts will be covered under warranty for genuine manufacturing defaults, misuse, scale or corrosion through poor water treatment or other outside factors will not be deemed as a manufacturer fault and will not be covered under these terms.

---

Conti Espresso UK, Unit 12-13 Wyndmere Park, Ashwell Road, Steeple Morden, Royston, Hertfordshire SG8 0NZ

Email: [info@conti-espresso.co.uk](mailto:info@conti-espresso.co.uk)

Tel: 01763 249398

[www.conti-espresso.co.uk](http://www.conti-espresso.co.uk)

Please note, we will not cover any fees associated with labour required to pay for the replacement.

In the event of a parts failure, please report the incident immediately to [service@ozespresso.co.uk](mailto:service@ozespresso.co.uk) with description of fault and machine serial number.

A replacement part will either be supplied by an approved service partner or dispatched on a next day service from our warehouse. Any part sent under the assumption of failure would have an associated invoice for the full value; this invoice will only be credited if part returned within 10 working days and deemed faulty by our service department.

Replacement parts will be covered by a further 12-month supply only warranty.

Should a part be replaced to then find not correctly diagnosed and not needed, we can still offer credit providing the new replacement part is returned to us in its original packaging and condition, any damage caused during fitting may mean a partial credit is offered. We do not offer a paid returns service and cannot cover postage fees.

Parts that are deemed serviceable/ perishable will not be covered under any warranty unless failure comes within 1 month of fitting/ installation, these parts are listed within our 'Service Kits'.

#### Labour Warranty 1st Year

- Full labour cover to all legitimate breakdowns on machine occurring within the first 12 months of installation
- Parts to be supplied FOC by Conti-Espresso UK – parts warranty 24 months from new.
- Faults deemed to be operator issues or hygiene related will be charged in addition at our standard callout and time rates

#### Parts & Labour Warranty Yr 2 & 3

To cover as listed for 1st year with same exclusions. Prices are only valid if taken out within the first 13 months of purchase and provided Conti or approved service partner have maintained machine since installation, all prices shown are per year.

Servicing\* from £180.00+vat per machine

This can be carried out at the discretion of the customer; however, Conti recommends that this is done after 6- or 12-months dependant on usage, this will be charged in addition to the breakdown cover prices above.

Parts may be required to complete a service and will be dispatched from Conti HQ, these will incur a delivery fee.

Servicing will include all labour & minor parts for a head and valve service, any water filters required will be charged in addition to these prices (water will be checked for Carbonate Hardness, PH and TDS).

\*SERVICE checks or replaces all main parts subject to wear through regular use these include

New Group gaskets

New Standard shower screens (Competition versions as standard on MC, upcharge on all other machines)

New Inlet gauzes/ filters

Steam valves (either service or replace)

Safety valve check (descale/ check or replace)

Anti Vac Valve check/ replace

Expansion Valve check

Steam/ Hot Water outlet gasket replacements

Boiler probe swap/descale

Pump check/ calibration

Grinder calibration/ shot levels checked

Blade check/ clean.

A full breakdown of parts and service procedure is available upon request.

Advisory notes will be given at time of service for all work required outside of usual service procedure.

We can also carry out preventative maintenance service visits, otherwise known as basic or 'front end' servicing. This is a more basic procedure therefore no fixed cost, time is charged on call out and labour basis and parts as required.

#### Boiler Insurance Inspections

At present, we are unable to offer full inspections and certifications nationwide, we can however provide this service on a regional basis, charged at £240 per inspection, or £220 if performed alongside a service.

---

Conti Espresso UK, Unit 12-13 Wyndmere Park, Ashwell Road, Steeple Morden, Royston, Hertfordshire SG8 0NZ

Email: [info@conti-espresso.co.uk](mailto:info@conti-espresso.co.uk)

Tel: 01763 249398

[www.conti-espresso.co.uk](http://www.conti-espresso.co.uk)

These are charged on a callout and time basis as inspectors requirements differ from one to the other.

#### Response Time and First Time Fix

All calls will be answered immediately and diagnosed where possible, remotely.

Time to site will vary depending upon Geographical location and spare part availability (we will not attend without relevant spare parts), 24hrs is the aim, although no guarantee can be given. We achieve a 97% first time fix once technician is onsite.

#### Operating times

Our standard operating and working hours are Monday – Friday 9am – 5.30pm, all faults should be logged with our office via phone and email (01763249398/ [service@ozespresso.co.uk](mailto:service@ozespresso.co.uk))

Saturday/ Sunday cover is currently not part of our standard service.
