

ELEGANCE IN EVOLUTION

Nestled quietly within the heart of Monaco is our small, but perfectly formed factory, hand-crafting espresso machines since 1956. We combine a genuine passion for innovation and coffee excellence, with exceptional quality and reliability to produce the finest machines for any circumstance or environment.

The NG•X; extreme performance, exquisite design, exceptional intuition.

A powerful stance and sharp aesthetic design exhibit the intentions of the NG•X; to define a new category of high-performance machine within the CONTI portfolio. The NG•X is the perfect balance between high performance and polished ergonomics, offering the barista full control over coffee quality whilst being the epitome of accessibility, usability & efficiency. Every component has been revised and refined to ensure that the NG•X surpasses expectations and continues to offer unrivalled build quality and reliability.

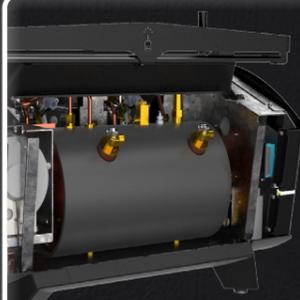

STRIKING DESIGN

The NG•X has been sculpted to catch the eye from every aspect. Subtle crown silhouettes are balanced with striking hand crafted angular bodywork. A study in refinement; its style has been considered equal to efficiency, with relocated and centralised supply pipework and machine drainage as an example of the latter.

RESPONSIBILITY

As part of our environmental study, we have insulated and optimised boiler sizes to help significantly reduce energy consumption, whilst our factory has embraced new boiler build technologies such as INDUCTION welding and ultrasonic conditioning baths to further reduce our footprint.

INTERFACE

A 3.5" TFT High Resolution colour touch display allows the barista and technician to quickly navigate the machines menu. It offers relevant real time shot information to enable greater shot consistency and overall drink quality. Additional features include shot data history, auto on/off, water filter and service interval management investing in you and your machine's future.

NGX ARCHITECTURE

Striking Design; modular layout and construction are the foundation of every machine, fortifying aftercare and ease of preventative maintenance whilst improving production efficiency at factory level. Careful consideration has been given every internal component and its location within the machine, separating electronics and hydraulics to give faster access and reliability.

ADDITIONAL FEATURES

PERFORMANCE NEW GROUP HEAD Design offers improved thermal efficiency, working in harmony with our proprietary FLOW CONTROL system and PID heating.

ERGONOMICS Lateral mounted infinite position steam actuators, with 'Quick Purge' function, allow precise control of steam flow rate to help texture all types of milk to perfection.

INTUITIVE INFUSION Designed to increase extraction consistency by reducing coffee distribution or tamping variables.

SHOT TIMERS To precisely monitor each individual extraction, for perfect consistency and quality.

AUTO ON/ OFF To ensure machine is ready when you need whilst offering reduced energy consumption when you don't.

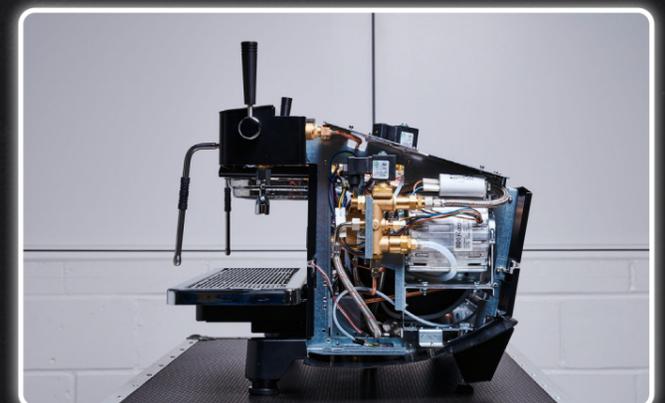

AUTOMATED STEP BY STEP CLEANING Promotes great hygiene and tastier coffee, simplifying the daily task, with on screen prompts and guidance.

INSTALLATION Smaller footprint, adjustable foot height and relocated centralised utilities ensure the machine can be set up perfectly, wherever you need.

COOL TOUCH STEAM WANDS To ensure easy cleaning and improve safety for the barista.
